ECOREP-PIRIOU builds three workboats for STH Spa

PRESS RELEASE

ECOREP-PIRIOU just recorded the order for three workboats for STH Spa, Algerian Company for Research, Production, Transport, Transformation, and Commercialization of Hydrocarbons to be operated in the harbours of Arzew, Bejaia and Skikda. They will be entirely built in Algeria - a first for that type of vessel - and their delivery is due during summer 2018.

These steel workboats of 13.85 m length and 5.5 m breadth will be powered by 2 x 450 hp engines.

ECOREP PIRIOU is already leader in Algeria for the building and repair of fish vessels. This first order in the sector of workboats is another successful step in its development to become a naval shipyard dedicated to the building of steel, aluminium and composite vessels up to 550 tons, and the associated services.

Main characteristics of the 3 workboats

Length:13.85 m	Hull / superstructure: aluminium
Breadth: 5.50 m	Propulsion: 2 x 450 CV
Loaded draught: 1.70 m	Bollard pull: 8.8 t
Crew: 4	On board fuel oil capacity: 6 m ³
Max. speed:9 kn	Fresh water capacity: 2 m ³

About ECOREP-PIRIOU

Created in February 2015, ECOREP PIRIOU is a joint-venture (ECOREP 51 % - PIRIOU 49 %) dedicated to the building and repair of steel, aluminium and composite vessels up to 550 tons.

Located in the harbour of Bouharoun - Wilaya de Tipaza (40 km west of Algiers), ECOREP-PIRIOU combines the experience and know-how of CCNBH, an ECOREP subsidiary, leader in Algeria for fiberglass construction and of the PIRIOU Group, French first private shipyard for naval building, engineering and repair.
