

Concarneau, January 7th 2020

PIRIOU signs the 250th aluminium vessel A 55m FPSV for JANA MARINE SERVICES

FPSV 55w: 55 m Fast Pax Supply Vessel with waterjets

PIRIOU has just recorded the order for a 55m FPSV from JANA MARINE SERVICES - Saudi provider of best-in-class integrated Marine Services to Offshore Oil & Gas Industry. Built by PIRIOU VIETNAM with a sea proven PIRIOU design, a dozen of vessels of this model were already delivered to various operators in the offshore oil industry. Several modifications will be brought to this vessel in order to answer the shipowner specifications - especially increased speed- thanks to a new propulsion system.

Delivery is forecast by the end of 2020 and the vessel will be exploited in the Arabian Gulf waters. This new order from JANA MARINE SERVICES follows the delivery of two 41m FPSVs 'JANA 17' and 'JANA 18' in 2017.

PIRIOU group C.E.O. Vincent Faujour says: ***"we value our relationship with JANA Marine, and we are proud about their trust in PIRIOU's abilities to deliver such a sophisticated high-speed vessel. JANA Marine being a returning client is an endorsement to our abilities to cater for their demanding operational needs with our vessels and after sales services"***

Through this new contract, PIRIOU confirms its position as the French leader for building -up to 55m- aluminium vessels. This signature is the symbol of the order of the 250th aluminium vessel PIRIOU has built!

Thanks to versatile building capabilities and according to customer priorities and vessel requirements, PIRIOU offers the best compromise to choose either steel/aluminium or aluminium building."

Jana Marine C.E.O. Mohammed AlSubaie said: ***"Signing of this new contract with PIRIOU reflects our trust in their capabilities and competitiveness. Timely delivery of this vessel will further cement the excellent business relations between Jana Marine Services and PIRIOU.***

FPSV 55w: a versatile and competitive vessel

The FPSV 55w is a very versatile aluminium vessel able to perform multiple functions in the oil offshore industry, including crew transfer and supply. Her sea proven design developed by PIRIOU INGENIERIE features a straight hull improving performances and crew comfort and offers a range of benefits:

- Improved speed for the same energy consumption fully loaded or light
- Much reduced consumption at economical speed
- Lounge equipped with seating for 60 personnel with maximum comfort
- Also offering great autonomy (139m³ fuel oil) and large cargo deck with 226 tons capacity. Her waterjet propulsion grants her enhanced manoeuvrability and improved safety thanks to the class 2 dynamic positioning system she is equipped with.

Main characteristics

Length:	55.1 m	Max. speed:	34 kn
Breadth:	10.0 m	Hull / superstructure:	aluminium
Depth at main deck:	4.4 m	Propulsion:	4 x 2000 kW - 4 waterjets
Max. draught:	2.28 m	Passenger capacity:	60 p.
Crew:	20 p.	Deck load:	226 t / 250 m ²

About PIRIOU

Involved in shipbuilding, repair, naval engineering and services since 1965, PIRIOU specializes in producing vessels up to 120 m with high added value through a combination of high-performance engineering and a global network of industrial sites in Europe, Africa and Asia. With over 470 ships built and delivered worldwide, PIRIOU provides bespoke solutions as well as a complete range of standardized or customized vessels that satisfy the requirements of international shipowners, whether they be private or public, civilian or military. www.piriou.com
